Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Leonard et al. ('898).

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The disclosure for the applied reference is directed to the same subject matter as the disclosure of the instant application. The applied reference interfaces between an aircraft with GPS and a precision guided missile as claimed. Please note, for example, the use of GPS mentioned at column 3, lines 24-38 of Leonard et al. ('898). The abstract of Leonard et al. ('898) mentions the translation of formats of the data downloaded into the missile and the loading of "mission parameters" into the missile. It is noted that the instant application is directed to the Harpoon missile system. Please

Art Unit: 3662

note the mention of the Harpoon missile at column 1, lines 18-28 of Leonard et al. ('898).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest for showing prior art systems and methods of interfacing between t aircraft and associated missiles for loading mission-related data.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernarr E. Gregory whose telephone number is (703) 306-5765. The examiner can normally be reached on weekdays from 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza, can be reached on (703) 306-4171. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9326.
